Process Engineer 2 cat.

> 4 years

ОАО «Belenergoremnaladka»

I'm engaged in the development of technological documentation and technological support for maintenance and repair of power equipment at power plants. I've developed an application for calculating sling schemes (Python 3, PyQt6). I have developed the projects of work production for Belarusian Nuclear Power Plant. Carried out laser alignment of the flow path of the steam turbine K-1200-6.8/50 and other auxiliary equipment of Belarusian NPP.

Technician

> 1 year

Research and Production Republican Unitary Enterprise «Belarusian state institute for standardization and certification» (BelGISS)

I worked in the scientific and methodological department of quality management. I was a member of TC BY 4 «Quality Management». Likewise, I was a part of the team that was preparing for the competition «The Prize of the Government of the Republic of Belarus for Achievements in the Field of Quality». I've implemented the automated translation software SDL Trados in the organization. Carried out translations of ISO standards.
